

Metro Stormwater Geodata Project (MSWGP)

MSWGP Steering Team: Meeting #6

Tuesday, August 27, 2019: 9:30 a.m. – 12:30 p.m.

City of Bloomington – Civic Plaza

1800 Old West Shakopee Road

Bloomington, MN 55431

Meeting Agenda

1 – City of Bloomington – Public Works Tour: Water Management (30-45 min.)

Short tour of the City of Bloomington Public Works facility stormwater management features including rain gardens, pervious surfaces, brine mixer, native grass installations and an overview of the Penn American Project with Bryan Gruidl, Senior Water Resources Manager. (Wayfinding to the site is found in the latter part of this agenda packet)

2 – Welcome and Introductions (est. 3 min.)

3 – Special MSGWP Announcement (est. 3 min.)

4 – General Project Status Update and 'Housekeeping' (est. 10-15 min.)

Basic update on project status, pilot project data collection, outreach and so forth.

5 – Prototype Standard: 'Step-Through' of Recent Changes (est. 1.5-2.0 hours)

Much of our prototype standard is essentially 'ready to test'. With the recent work of the Structures Work Team in June and July, we have the remaining pieces in place to offer a prototype stormwater geodata transfer standard to offer to the wider professional community to test and review. We will 'step-through' just the portions of the standard that have been re-vamped or reworked to get everyone on the same page. Steering Team members are encouraged to bring additional revisions, suggestions or comments to inform this final round of development.

6 – Reconfiguring the MSGWP Steering Team (est. 15 min)

As the sixth meeting of the Steering Committee, the MSWGP has fulfilled its initial commitment to convene 4-6 times over a period of 12-18 months and deliver a working prototype standard. The group will discuss how it wishes to continue during the testing, pilot, review and comment gathering period in late 2019-early 2020.

7 – Re-Cap of Next Steps in the MSGWP (5 min)

8 – Other Business

Wayfinding for MSWGP Meeting #6: Tuesday, August 27, 2019

We'll gather at the **Civic Plaza, 1800 W Old Shakopee Road**, at the **far eastern parking lot** (in yellow) >>

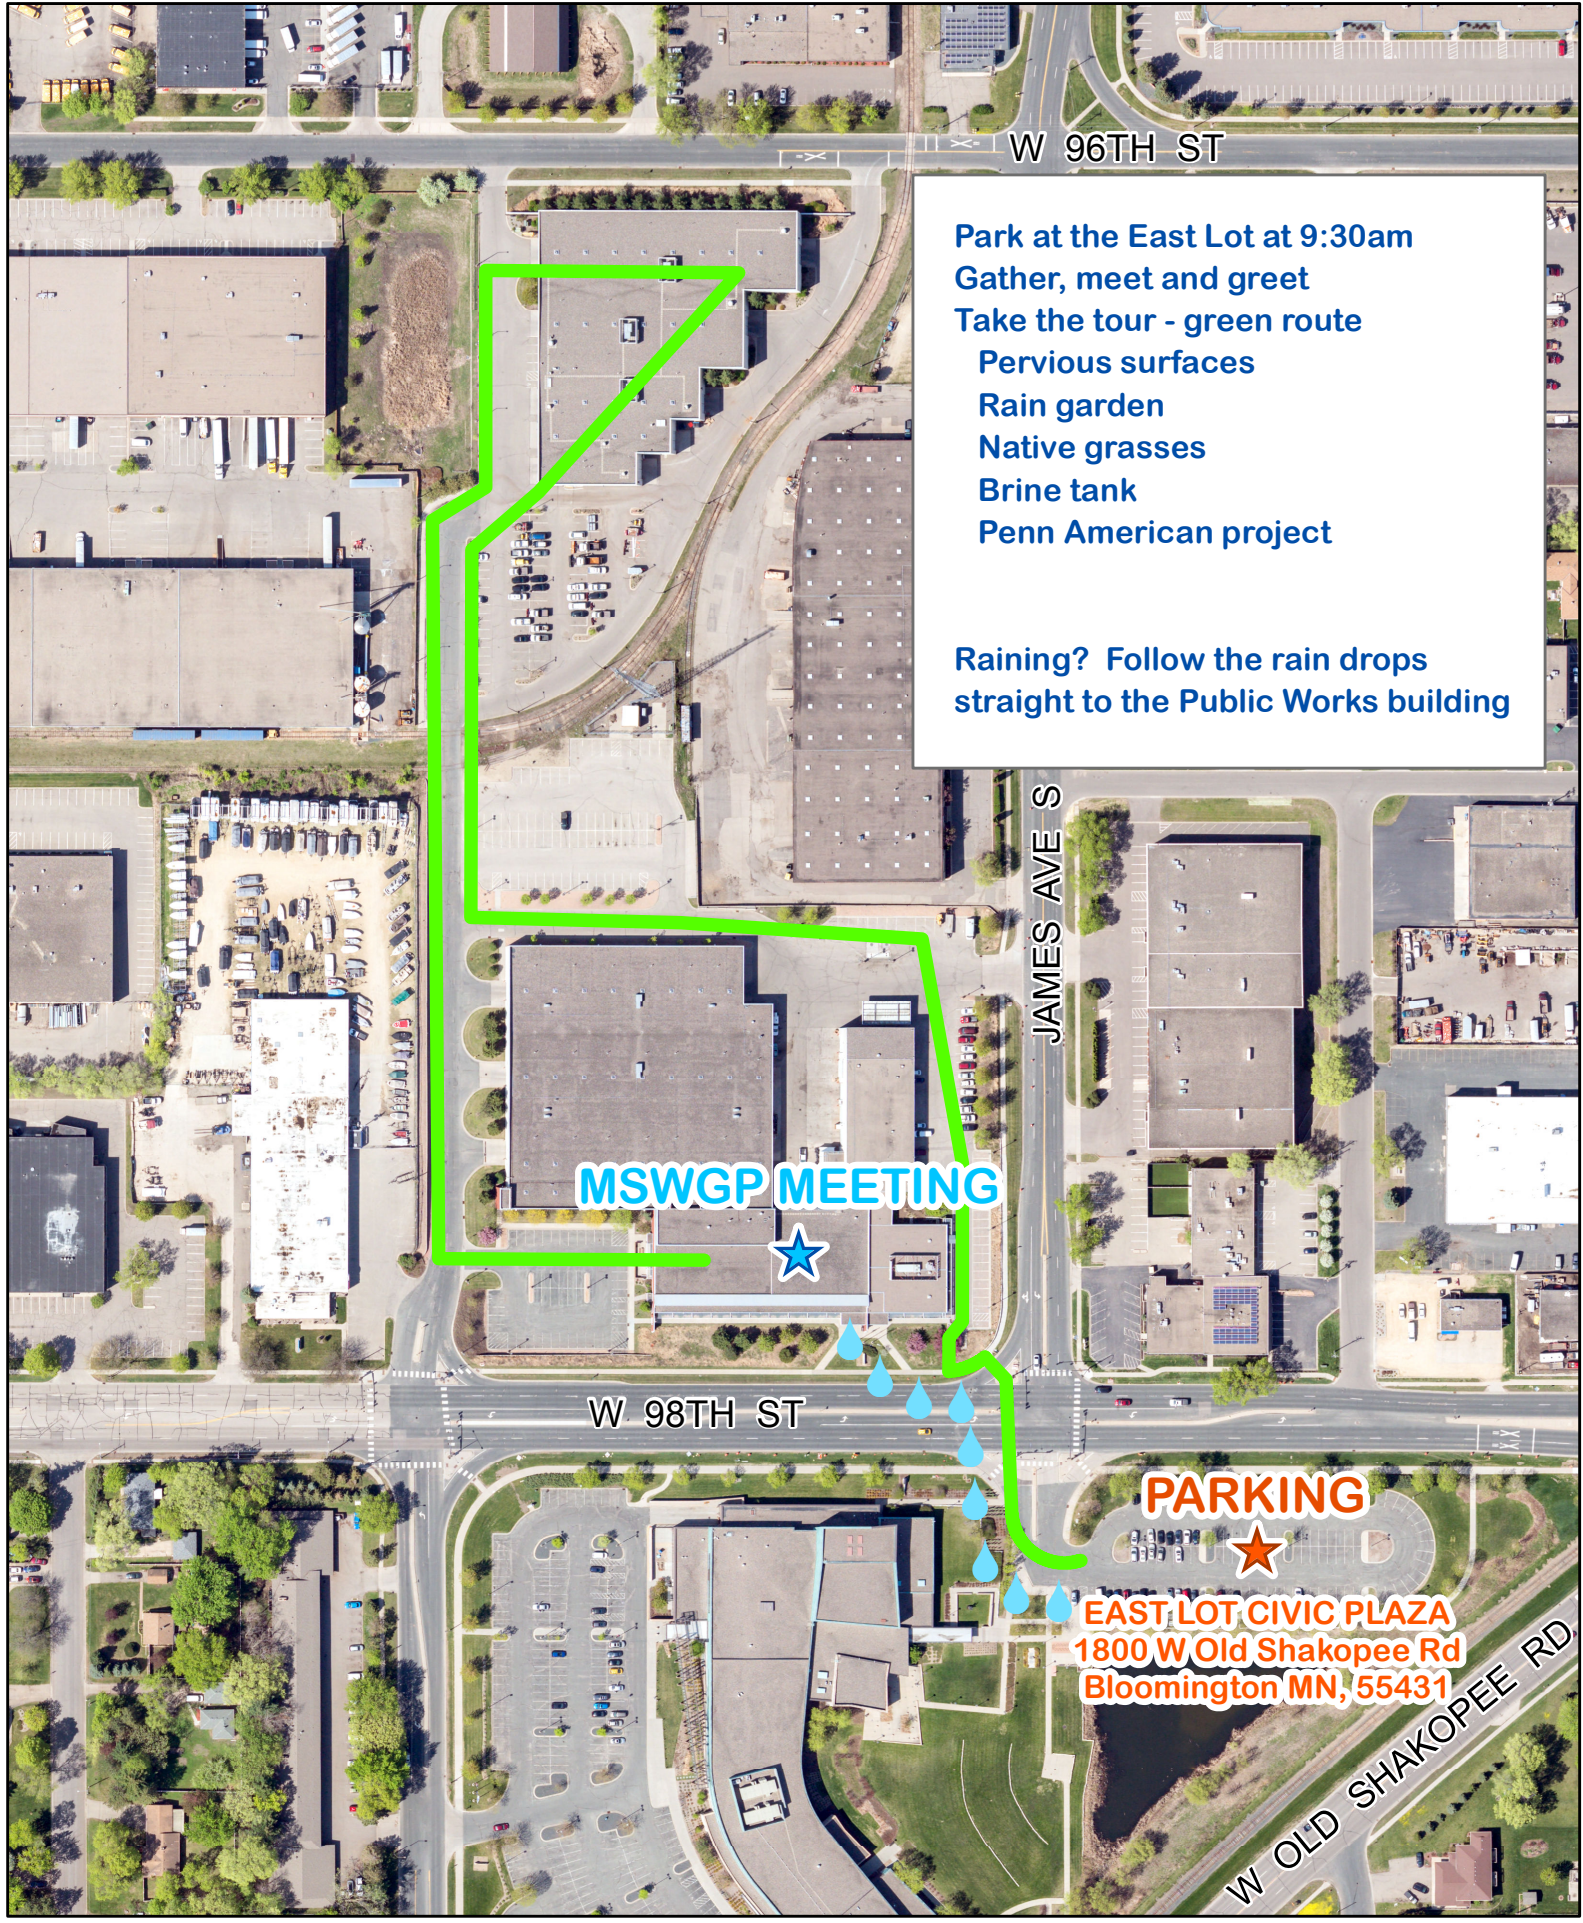

From there we'll go on a tour around the facility; across the street to Public Works

The tour: Bryan Gruidl, Senior Water Resource Manager at the City of Bloomington, will take us on a walk around Public Works, discussing the various water related items – rain garden, pervious surface, brine mixer, native grasses, etc.

We will conclude with a brief presentation in the Public Works meeting room about the Penn American Project and then can settle into the remaining work of our **MSWGP** effort.
