

MetroGIS – January 2023 Needs Assessment Questionnaire

Moving into 2023 (and beyond), the main priorities of the MetroGIS collaborative remain:

- (1) Maintain and support the continued availability of the regional datasets for road centerlines, address points, parcels, and parks & trails; and,
- (2) Provide a forum for the various members of the geospatial community (both data producers and data consumers) to “shepherd” the regional dataset maintenance process and to identify and work on projects meeting shared needs.

This short “free-form” questionnaire is provided to help understand our community’s current and emerging needs. Please provide some feedback for discussion at our next meeting.

Question 1: The most important or critical geospatial data to my agency/department/business includes the following:

Question 2: The kinds of data that my agency needs and is unable to acquire in a timely, complete, consistent, or cost effective manner include the following:

Question 3: My agency/department/business would benefit in having access to the following types of web map services/feature services:

Question 4: Please describe any challenges or unmet needs your agency/interest/business has in working with geospatial technology, geospatial data, etc.

Question 5: Please provide any additional comments, suggestions or ideas.
